

Elizabeth Kelley, MA

Elizabeth has been engaged in providing education and information on electromagnetic fields health and safety since 1996. She has training and work experience in public health and public policy. She has a Masters' degree in public administration, specializing in community health services, earned at the University of Southern California. She worked for the U.S. Department of Health and Human Services (DHHS) in the Office of the Secretary in Washington D.C. for a decade as an analyst, where she conducted large studies evaluating major health and welfare issues, including conducting a study of the U.S. Food Stamp Program for the U.S. Senate Agriculture Committee. She entered federal service as a U.S. Presidential Management Fellow.

She is Founder and Executive Director for the Electromagnetic Safety Alliance, Inc.

ESA is directly engaged in managing two projects:

- **The International Electromagnetic Field Scientist Appeal**, initiated in 2015, that calls for greater health protection for mankind and nature from non-ionizing radiation, signed by over 250 scientists who have published EMF papers in professional journals, addressed to the United Nations, the World Health Organization and to U.N. member nations, www.emfscientist.org.
- **The International Commission on the Biological Effects of Electromagnetic Fields**, whose primary purpose is to make recommendations, based on the best peer-reviewed scientific research publications, that include, and go beyond establishing numerical exposure guidelines. ICBE-EMF is dedicated to ensuring the protection of humans and other species from the harmful effects of non-ionizing radiation. ICBE-EMF is made up of a multi-disciplinary consortium of scientists, doctors and related professionals who are, or have been, involved with research related to the biological and health effects of electromagnetic frequencies up to and including 300 GHz. www.icbe-emf.org
